EXPERIENCE

CASSIOPEIA WEB AGENCY

2015 – Present

FOUNDER

As the founder of Cassiopeia, I built and designed a series of websites for multiple clients. The technologies used were: Angular, HTML, CSS, Javascript, CMS, Ruby on Rails, GitHub.

Projects include:

Akar De Nissim: http://akardenissim.com/

Le'ola Wellness: https://leolawellness.squarespace.com/

Jamie Morgan: http://www.jamiemorgan.co.uk/

Current project:

Suze Orman show

AUTODESK

San Francisco, CA

2014 - 2016

SOFTWARE ENGINEER

Focused on front-end development, including design and implementation of client side data models, views, business logic, and unit tests.

Involved in the entire product lifecycle from wire framing to rapid prototyping, constant iterations, and into production.

Created an on-boarding program for incoming developers into our teams which made their experience smoother.

The technologies used were: Angular, Backbone, Javascript, HTML, CSS, GitHub.

EDUCATION

GENERAL ASSEMBLY

San Francisco, CA

2014

FULBRIGHT RESEARCH FELLOW

Developed a mechanism to reprogram mature skin cells into brain cells without having to make them stem cells first, using laboratory techniques, a genome-wide screen, and data analysis. Oversaw the design of five experiments that ran simultaneously.

CALIFORNIA STATE UNIVERSITY

Northridge, CA

2010 – 2013

BACHELOR'S DEGREE IN POLITICAL SCIENCE
